

LANDMARKS OF

NANTUCKET!

Lydia **GULLICKSEN**

I just got my braces off! I'm thirteen years old and my favorite color is purple. I like riding horses and writing. I wanted to be in this program to learn more about Nantucket and taking pictures. I think I have learned more about both. I try to take pictures different from everyone else's.

SHELLS ON BRANT POINT

Nantucket is an island; therefore, it is surrounded by water and with water come shells. This is why this picture really makes me think of Nantucket. I also love the different soft colors of the shells.

SEAGULLS AT GREAT POINT

This is a picture of seagulls at Great Point. Behind them is a crashing wave, off the Great Point Rip. Nantucket has a lot of wildlife. Great Point is a great place to visit. This shows two great things about Nantucket.

PATH TO THE SEA

I took this picture at Great Point from the top of the lighthouse. I like how you can see the ocean and the twisting road that leads to it from the lighthouse. I really like the view from the top of the lighthouse, it really shows Nantucket from a different point of view.

HARBOR VIEW

A can is the tall green buoy, just so everyone knows. I think this picture is a good example of what people first see when they look at Nantucket as they arrive by boat. I think that is very important. I also see the can and since a lot of Nantucketers go out on the water in boats, I think this means a lot to Nantucket.
